

# WEEDS: SO MANY, SO LITTLE TIME

- **Winter weeds:** henbit, deadnettle, chickweed, Persian speedwell, mustards, horseweed, and more!
- **Summer weeds:** black medic, lamb's quarter, purslane, ragweed, spurge, creeping charlie and more!
- **Perennial weeds:** Come back year after year and may spread by above ground or below ground stems and/or rhizomes
- **Annual weeds:** Grow from seed each year.
- **Invasives:** tiny sprigs of bush honeysuckle and wintercreeper are easier to pull in the spring or in the fall (when the ground is damp), and often easier to spot.
- **Sometimes it is best to snip off the weed at ground level** instead of pulling it out in order to minimize soil disturbance.
- Check out Missouri Botanical Garden's website for more info, or utilize **Mizzou's Weed ID Guide**

## COMMON GARDEN WEEDS    annual (a)    perennial (p)

creeping charlie / ground ivy (p)

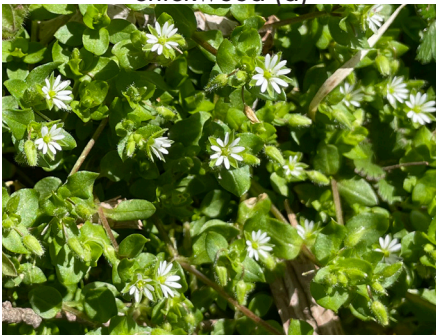

henbit (a)

dead nettle (a)

chickweed (a)

wintercreeper (p)

bush honeysuckle (p)

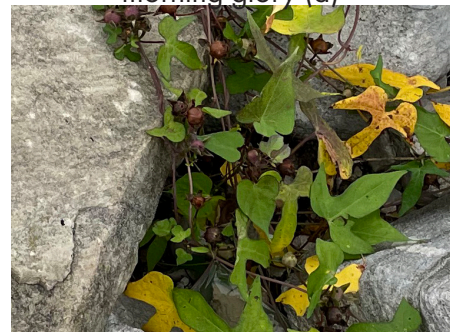

pigweed (a)

peppergrass (a)

morning glory (a)

# COMMON GARDEN WEEDS...cont.

yellow woodsorrel (p)

purslane (a)

creeping spurge (a)

plantain (p)

common mullein (b)

poison ivy (p)

burmuda grass (p)

broadleaf signalgrass (a)

dandelion (p)

honeysuckle (p)

crabweed/mulberry weed (a)

smartweed/lady's thumb (a)

copperleaf (a)

dallisgrass (p)

teasel (p)
